

Hospital Based Provider Enrollment Form

Health Plan of Nevada/Sierra Health and Life do not credential inpatient setting only practitioners: providers who practice exclusively in an inpatient setting and who provide care only as a result of a member's treatment in an inpatient setting. Providers working exclusively in the emergency room of a hospital are considered hospital based whether providing inpatient or outpatient services. Provider specialties that fall under this definition per the National Committee for Quality Assurance (NCQA) include: Anesthesiology, Emergency Medicine, Hospitalists, Neonatology, Pathology, and Radiology. Please note that telemedicine providers do not fall under the definition of hospital based, and that full credentialing is required for this provider type prior to being considered in-network.

Please fill out the following fields for the provider you wish to add as hospital based only:

Name		Date of Birth	
Social Security Number		Gender	
Degree			
Specialty			
NPI		Group Tax ID	
Hospital Affiliation(s)			
Start Date			
Practice Address			
Phone/Fax Number			

I attest that the provider listed above practices exclusively in an inpatient setting only:

Provider or Credentialing/Contracting Designee

Please attach the following documentation with your request:

- LOI - (if not previously submitted)
- Provider Add Request Form (if joining an existing contracted provider group)
- License and DEA Certificate
